Collections & tags blueprint

Sports Nutrition Hub · new website launch · prepared 7 November 2026

This is the full map of how products are organised on the new website: every menu link, the collection behind it and how many products it holds today. It then proposes what to fix, merge and create, and how to tidy the product tags. **Khizer's part is the approval list on the last page.** Everything here was read from the live store and the new website's menus today.

At a glance: 252 products · 100 collections (5 of them empty) · 176 different product tags (61 used on only one product).

1. Current structure: the main menu

Supplements

Menu link	Collection	Products	Status
Build muscle & strength	muscle-and-strength	87	✓
Lose fat	fat-loss	24	✓
Energy & endurance	energy-and-endurance	—	⚠ Collection missing

Science in Sport	sis	24	✓
Surge	surge	3	Low (under 5)
Trace Minerals	all products	—	⚠ Links to all products
Vitabiotics	all products	—	⚠ Links to all products

What this shows: the structure is solid. 76 of 87 menu links work (17 of them have fewer than 5 products). The problems are 2 links to a collection that doesn't exist (Energy), 2 links to a search page instead of a collection (Recovery, BETA Fuel), 2 links to empty collections (Iron, Lifting straps) and 5 brands that open "all products" instead of their own page.

2. Collections that overlap

Several collections hold almost the same products. Shoppers see the same page twice under different names, and you have more to maintain.

Collections	Products shared	Proposal
Stimulant (15) and With Caffeine (12)	12	Keep **With Caffeine**, retire Stimulant (not in any menu)
Non-Stim (10) and Without Caffeine (11)	9	Keep **Without Caffeine**, move the 1 extra product, retire Non-Stim
Beauty & Skin Care (9) and Beauty, Hair & Skin (12)	6	Keep **Beauty, Hair & Skin**, add the 3 extras, retire Beauty & Skin Care
Hair Supplement (6) and Skin & Nails Supplement (6)	6 (identical)	Fold both into **Beauty, Hair & Skin**
BCAA & EAA (3) and Aminos & BCAA (6)	3	Keep **Aminos & BCAA** and point both menu links to it
Energy Gels (8) and Energy Gels & Endurance (50)	8	Keep both: one is gels only, the other is the full endurance range
Fat Burners (12), Fat Loss (24), Weight Management (29)	all 12 / all 24	Keep all three: each is a step wider than the last

3. Proposed fixes and new collections

#	Collection	What it would contain	Products	Why
A	Energy & Endurance	Point the 2 menu links at the existing **Energy Gels & Endurance**	50	The link target doesn't exist; no new collection needed
B	**Recovery** (new)	Products tagged Recovery or Recovery Powders	32	Menu link currently opens a search page
C	**BETA Fuel** (new)	Product title contains "Beta Fuel"	3	Menu link currently opens a search page
D	**Bestsellers** (new)	Hand-picked top 12–20 sellers	12–20	Used by the cart suggestions and the wholesale page
E	New Arrivals (change)	Only products added in the last 60 days	25	Today it holds 122 products going back to 2020
F	PhD (fix)	Vendor is PhD	4	Collection exists but is empty, though 4 PhD products are live
G	Trace Minerals (link)	Link the brand list to the existing **Trace** collection	9	Brand list opens all products today
H	Iron, Lifting Straps	Add products, or remove the menu links	0	Empty pages in the menu
I	BSN, Centrum, Ronnie Coleman, Vitabiotics	Remove from the menu brand list, or create a brand page each	0–1 each	They open all products today
J	Optimum Nutrition, Vaughn's Treats	Hide (not linked anywhere)	0	Empty
K	Plant-based protein (change)	Vegan Protein plus products tagged Vegetarian	8	Vegan Protein has only 4 products

4. Product tags

There are **176 different tags** on 252 products. Tags drive the automatic collections, so messy tags mean products quietly go missing from collections.

How the tags break down today

Kind of tag	Examples	Comment
Category (build the collections)	Whey Proteins (34), Pre-Workout (27), Creatine (24), Sleep Health (19), Informed Sports (54)	The core. Keep.
Goal / range	Train & Perform (137), Muscle & Strength (87), Health & Wellness (93), Energy & Endurance (50)	Keep. These power the big menu sections.
Feature	With Caffeine, No Caffeine, STIMULANT, NON-STIM, FLAVORED, UNFLAVORED	Keep one pair per idea (see section 2)

Kind of tag	Examples	Comment
Brand	REVIVE (12), SiS (4), Applied Nutrition (3), RAW Nutrition (3), RYSE, ABE	Not needed: brands already come from each product's brand (vendor) field. Remove.
Size / format	90 Capsules, 30 Servings, TABLET FORM, 132g, Powder, sample, trial	Not used anywhere on the site. Remove.
Lower-case duplicates	daily-wellness, whey-protein, gut-health, energy-gel … (38 tags)	Older copies of existing tags. Merge into the main tag.

Duplicates to merge (same idea, different spelling)

Keep	Merge in
Whey Proteins (34)	Whey Protein (5), whey-protein (3), WHEY PROTEIN (2)
Daily Wellness (36)	daily-wellness (11)
Magnesium (9)	magnesium (5)
Gut Health (13)	gut-health (1)
Hydrolysed Protein (5)	Hydrolyzed Protein (5)
ENERGY GEL (4)	energy-gel (3), Energy Gel (1)
Isolate Protein (9)	ISOLATE PROTEIN (1), Protein Isolate (3)
Clear Whey (3)	CLEAR WHEY (1)
HYDRATION (7)	Hydration (1)
Multivitamins (7)	multivitamin (1)
Vitamin C, Zinc, Calcium, Shilajit	their lower-case copies

Tags only partly applied. Some collections hold far more products than carry the matching tag: Minerals (27 products, 13 tagged), Letter Vitamins (21, 10 tagged), Magnesium (20, 9 tagged), Ashwagandha (13, 5 tagged), Herbs & Natural (21, 11 tagged). Once tags are tidied, these collections can fill themselves automatically instead of by hand.

Tags the new website reads: *Informed Sports* (shows the Informed Sport badge; already on 54 products, works today) and *bestseller* (shows a Bestseller badge; on no products yet).

5. Approvals for Khizer

Tick **Yes** to approve as proposed, or write a change in Notes. We do the work once approved.

#	Proposal	Yes	Notes
1	Approve the menu structure in section 1 as the launch structure	☐	
2	**A**: point "Energy & endurance" at Energy Gels & Endurance (50 products)	☐	
3	**B**: create a Recovery collection (32 products)	☐	
4	**C**: create a BETA Fuel collection (3 products), or link to Science in Sport instead	☐	
5	**D**: create Bestsellers. Khizer to send the list of top sellers	☐	
6	**E**: New Arrivals shows only the last 60 days	☐	
7	**F + G**: fix the PhD collection and link Trace Minerals	☐	
8	**H**: Iron and Lifting Straps: remove links (or say which products to add)	☐	
9	**I**: remove BSN, Centrum, Ronnie Coleman and Vitabiotics from the menu brand list	☐	
10	**J**: hide Optimum Nutrition and Vaughn's Treats	☐	
11	**K**: widen Vegan Protein to Plant-based protein (8 products)	☐	
12	Merge the overlapping collections in section 2	☐	
13	Tag clean-up: merge duplicates, remove brand and size tags, one spelling per tag	☐	
14	Add the *bestseller* tag to the top sellers (same list as 5)	☐	

Read from the live store (www.sportsnutritionhub.lk) and the new website's menus on 7 November 2026.
