Email automations: status & go-live plan

Sports Nutrition Hub · new website launch · prepared 7 November 2026

The new emails are built in the SNH brand and loaded into Klaviyo. Nothing new is sending yet: every new automation is in **Draft**, and your 4 current automations are untouched and still sending. This page explains what is ready, what is waiting, and the safe order to switch over.

1. What's done

- **44 email designs** loaded into Klaviyo (named "SNH · ..."), plus **15 order and account emails** ready to paste into Shopify (section 4).
- **New lists:** Quiz takers, Wholesale leads, Franchise leads. **New audiences:** Engaged (opened or clicked in the last 90 days) and Unengaged (no opens or clicks in 180 days).
- **12 automations built and waiting in Draft:**

Automation	Starts when...	What it sends
Welcome series	someone joins the newsletter	3 emails over 4 days: welcome, how SNH Elite points work, best sellers
Abandoned cart	someone adds to cart but doesn't check out	3 reminders: after 2 hours, 1 day, 3 days (Koko and a bundle idea in the later ones)
Abandoned checkout	someone starts checkout but doesn't pay	2 reminders: after 1 hour and 1 day
Browse abandonment	someone looks at a product but doesn't add it	2 emails: after 4 hours, then "goes well with" 2 days later
Post-purchase	an order is placed	thank you + points earned (1 hour), a bundle idea (2 weeks)
Review request	an order is delivered	a review request after 7 days
How to use	an order is delivered	a short protein guide after 3 days (creatine, pre-workout and SiS guides to add, see section 3)
Replenishment	an order is placed	"running low?" after 25 days, if they haven't reordered
Win-back	an order is placed	"we miss you" after 90 days with no new order, a follow-up 2 weeks later
Sunset	a subscriber hasn't opened anything for 6 months	one "still want our emails?" message
Wholesale reply	someone sends the wholesale form	an instant "we have your enquiry" reply with next steps
Franchise reply	someone sends the franchise form	an instant "we have your enquiry" reply

All are sent from support@sportsnutritionhub.lk. The reminder emails (cart, checkout, browse, replenishment, win-back) stop as soon as the shopper buys.

2. Your 4 current automations and the switch-over

Current automation (still sending)	Replaced by
Abandoned Cart	Abandoned cart (new)
Customer Thank You – New vs. Returning	Post-purchase (new)
Post-Purchase Followup – Order Count Split	Review request + How to use (new)
Customer Winback – Standard	Win-back (new)

Go-live order. For each pair: switch the new one on, then switch the old one off **the same day**, so nobody gets both. Check the first few sends the next morning before moving to the next step.

1. Abandoned cart (new on → old Abandoned Cart off)
2. Post-purchase (new on → old Customer Thank You off)
3. Review request and How to use (new on → old Post-Purchase Followup off)
4. Win-back (new on → old Customer Winback off)
5. New, nothing to replace: Abandoned checkout, Browse abandonment, Welcome series (after the discount codes exist)
6. Wholesale and Franchise replies (once the website forms are live)
7. Replenishment, then Sunset last (after a month of sending, so there is engagement history)

3. 12 automations waiting on information

These designs are ready, but each needs some information to exist before it can be built. Step-by-step instructions are written for each one.

Automation	What it needs	Who provides it
Quiz plan (free workout plan)	The quiz on the new website sending answers to Klaviyo	Happens automatically when the new website goes live
Popup discount code	Discount codes WELCOME5, WELCOME7, WELCOME10 and the popup form linked to Klaviyo	Khizer (codes), then we link the form
Back in stock	Klaviyo's back-in-stock feature switched on	Khizer approves, we set it up
Price drop	Product catalogue in Klaviyo (already syncing)	Ready to build any time
Monthly points statement	Each member's points and tier in Klaviyo	Esoft loyalty sync
Tier upgrade (Silver, Gold)	Each member's tier in Klaviyo	Esoft loyalty sync
Close to next tier	Spend and progress to the next tier	Esoft loyalty sync
Reward ready (2,500 points)	Points balance	Esoft loyalty sync

Automation	What it needs	Who provides it
Redeem confirmation	A message from the loyalty system when points are redeemed, with the code	Esoft loyalty sync
Points expiring	A message from the loyalty system before points expire	Esoft loyalty sync
Birthday reward (Silver 10%, Gold 15%)	Birth dates (the new sign-up form asks for them), tier, and birthday codes	New website + Esoft + Khizer (codes)
Referral	The referral programme	On hold until referrals launch

The **How to use** automation also needs three more branches (creatine, pre-workout, SiS) added by hand. The designs are ready.

4. Shopify order & account emails (15 to paste)

Shopify has no automatic way to load these, so they are pasted one by one in **Shopify admin → Settings → Notifications**. Each takes about 2 minutes. Copy the old one into a note first; Shopify also has "Revert to default".

#	Shopify email	Why it matters
1	Order confirmation	Every customer gets it; shows points earned and Koko / cash on delivery notes
2	Shipping confirmation	Tracking button
3	Local order out for delivery	Same-day Colombo deliveries
4	Ready for local pickup	Store pickup
5	Customer account invite	Activating SNH Elite accounts
6	Customer account welcome	After activation
7	Customer password reset	Account access
8	Order cancelled	
9	Refund notification	
10	Order edited	
11	Shipping out for delivery	Courier deliveries
12	Shipping delivered	
13	Payment reminder	Bank transfer orders
14	Draft order invoice	Orders you create for customers
15	Gift card created	

After pasting each one, press **Preview** and **Send test email**. If Preview shows an error, paste the old one back and let us know.

5. What we need from Khizer

1. **Approve the Klaviyo app update** in Shopify (Apps → Klaviyo), so the new website's quiz and forms can send data.
2. **Create the welcome discount codes** WELCOME5, WELCOME7 and WELCOME10 (5%, 7%, 10% off, one use per customer, valid 7 days) in Shopify → Discounts.
3. **Birthday codes:** confirm 10% for Silver and 15% for Gold, so we can set up unique birthday codes.
4. **Confirm the review link:** are reviews collected with Judge.me? If yes, switch on the Judge.me → Klaviyo connection so the review email opens the review form directly.
5. **Confirm the loyalty data sync with Esoft:** each member's tier, points, yearly spend, progress to the next tier and birth date need to reach Klaviyo, plus a message when points are redeemed or about to expire.
6. **Paste the 15 Shopify emails** (section 4), or give us staff access to Notifications and we'll do it.
7. **Agree the switch-over day** for section 2, ideally a weekday morning so the first sends can be checked.

WhatsApp in every email: +94 77 977 3359. All emails link to www.sportsnutritionhub.lk.
